Education

- **University of California, Riverside** Riverside, CA
B.Sc., Computer Science (GPA: 3.7/4.0) *Sep. 2016 - Present*

Work Experience

- **CTRL LA** Venice, CA
Full Stack Developer *Jun. 2015 - Aug. 2015*
 - Worked on Shadowbid, which tracks and executes automated purchases on any Amazon product that falls below a user-specified trigger price.
 - * Created CRUD aspects of backend in Node.js, along with implementing several APIs (Amazon, Zinc, Value.io)
 - * Created a Chrome Extension that can interface with the backend, and be used on Amazon.com. Logic handled through Angular.js.
 - * 300+ weekly active users
- **GoGoGrandparent** Remote
Full Stack Developer *Apr. 2017 - Present*
 - GoGoGrandparent offers affordable senior transportation, through a telephone interface to Uber and Lyft. Our goal is to help those unaccustomed to smartphone apps safely access various services.
 - * Pioneering new web front-end for back-end previously only accessible by a phone call.
 - * New interface slated to go into mainstream use by August 2017.

Projects

- **S.A.M.** HackPoly
Stop Annoying Messages *Feb. 2017*
 - Worked against Facebook chat API limitations by integrating unofficial chat API, wrote code to handle several concurrent message threads.
 - Responsible for modularization of project so that anyone can spin up their own S.A.M
 - This feature was later implemented by Facebook on all Messenger platforms.
- **Juke** SDHacks
Twitch plays Spotify *Sep. 2016 - Oct. 2016*
 - Created back-end of application, which involved fusing Twitch and Spotify API's together
 - Added messaging per-channel functionality to existing Node.js wrapper around Twitch API
 - Won Twitch Sponsor prize
- **Daily Motivation**
Countdown to Midnight *Jul. 2015 - Present*
 - Chrome extension that overrides new tab page to show time left until midnight
 - Wrote offline compatibility fallback to system time
 - 250+ weekly active users
